Dear Colleague,

41st Oholo Conference on
PROGRESS IN
ALZHEIMER'S AND PARKINSON'S DISEASE
Fourth International Conference
will be held in
EILAT, ISRAEL ON MAY 17-23, 1997.

The scientific Conference will be organized around key subjects concentrating on the latest development in the field, and topics which would encompass applications both to Alzheimer's and Parkinson's disease.

We, the organizers, are cognizant that 1.5 years from now is a long time in order to predict the topics for the meeting; yet, we believe that by 1997 a wide range of information will be accumulated in these exciting fields of neuroscience. Therefore, a careful planning of the topics to be discussed will make this Conference a unique opportunity for a most comprehensive exchange of information. Great emphasis will be given both to the selection of the scientific topics as well as to the social programs.

We have chosen the city of Eilat, an international resort, as the venue for our Conference.
Eilat is located at the southernmost point of Israel on the shores of the Red Sea, surrounded by the hues of the Edom Mountain Range. The neighbouring Jordanian Port City of Aqaba promises, inview of the recent peace treaty, to be an exciting pre or post Conference tour choice.

We are starting to select topics and speakers for the Conference.
Your suggestions in this regard are most welcome.

Should you be interested in participating in the Conference, please complete and return the enclosed questionnaire at your earliest convenience.

Kindest regards,

Abraham Fisher, Ph.D.
Conference Coordinator
